Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Newberg (1,793,714).

Newberg ('714) discloses a hand tool comprising: a handle and at least one operation end connected to an end of the handle, the handle including a first section and a second section, the at least one operation end connected to the first section, the second section having a wide surface which is located on a plane which is perpendicular to a plane where a surface of the at least one operation end is located; wherein the handle has a twist portion which is located at a mediate portion thereof and the first section and the second section are respectively connected to two ends of the twist portion; wherein the handle is a curve and flat plate.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hsieh (D 434,292).

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Monnet et al. (5,172,614).
5. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Hu (D481,276) or Macor (6,655,239).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Macor (D481,613) discloses a double-ended wrench handle having a twist in the mediate portion. The applicant also has a design patent (D481,597) which discloses an adjustable wrench disposed on one end of a handle having a twist in the mediate portion.
